

PRE-PURCHASE INSPECTIONS

Buying a home is everyone's dream - we recommend a Pre-Purchase Inspection Report be carried out on your future home.

We will visit the site and conduct a detailed report on the condition of the building, and general issues pertaining to the dwelling thus saving you unwanted worry and expense in the future.

The purchase of a home could be the largest single one transaction that a consumer could ever carry out in their life.

Your purchase of your new investment should be dealt with by expert personnel so as to ensure you are appraised of all aspects dealing with your property.

Our consultancy services provide for the following items to be included:

- › The basic structure of the home
- › The condition of the roof
- › The condition of walls windows and doors
- › The sanitary plumbing
- › The condition of domestic appliances i.e. stove hot water service etc.
- › The condition of fencing to boundary lines of the property
- › And the general condition of the interior of the home

Our Costs are very reasonable, a small investment for the biggest asset you will probably ever own being your own home.

Don't make costly mistakes in purchasing your new home.
